EDITORIAL

Dear Friends,

the initial release last month of the new Löök line brough with it that age-old question ,where is this all headed?’ Well, it’s headed to a good place. Fortunately, we are still in the midst of a certain number of modellers, those hard core boys who need that daily fix of putty, seatbelts as thin as cigarette paper lovingly threaded through functional buckles and an instrument panel that is a composition of laminated instruments incased in ClearFix amongst the silent majority that have a certain tendency towards a higher level of comfort. These are trends that we are keeping pretty close tabs on. As a result, we are sympathetic to those modellers who strive for an improvement in their kits through the development of our products of which the Löök line is the latest of such innovations. Of course, this is not the end of development of such products in our firm, but merely a continuation of it. For example, we over the month of June, have fine-tuned our printing capabilities to squeeze out a little finer and sharper detail which will allow us to push the Löök line into 1:48th scale. The first quarter scale Lööks will hit the market in September, but the results will be visible also in the colour photoetched items that will be released before then. If I return to the question as to weather or not replacing a stock part with one that is preassembled and prepainted to the levels that these items are, is, in fact, modelling, my answer is a resounding yes, it is. Our form of modelling has always been about the assembly of prefabricated components in one form or another, so in that regard, this is nothing really new. The main difference is that today’s concepts of prefabricated assembly components is vastly more advanced than in years past. On the other hand, this by no means suggests that there is no further room for improvement. It is always possible to improve on something, and if you are not spending time on the above mentioned traditional exercises, to which can be added puttying and sanding, you end up with more time to devote to more modern modelling endeavours, weather it’s the addition of details or dedicating time to the final look of the finished pro-

duct through things like weathering and preshading and washing, regardless of weather it is from the Spanish or Czech school of thought. I basically understand that our approach to these innovations is for the mostpart quite rare and that, as a result, there can be certain doubts that can creep in on the part of the general modelling public. In my opinion, that’s quite alright and I don’t mind. Those that follow the traditional methods have enough to do, but a breath of fresh air never killed anyone. The idea even applies to things like this on-line newsletter or our Facebook page. From time to time, someone chastises us for having political opinions and for dealing in history, that we should just make our kits, concern ourselves with the retail process, and shut up about the rest. History is an integral part of this hobby, and there’s no room to argue on that point, I think, but striving for a more thorough knowledge of these things makes no sense. The historical stuff does, and so we will continue to study, monitor and comment on it. This will naturally lead to some periodic controversy, and historical conversations are often controversial in nature to begin with. Don’t tell me that weather it’s at a club meeting or in a bar, that a historical (or political) debate doesn’t often lead to controversy! The two are umbilicly connected and that’s a fact. Political events today are tomorrow’s historical notes and weather they are judged positively or negatively will be revealed then, but a certain amount of skepticism is never a bad thing. So the next time someone jumps all over us for the comment or expression of a historical or political concept, they should maybe just step back and look at what we are really trying to say. This is all in reference to a recent Facebook posting on our page regarding the meeting between Trump and Kim, suggesting that trusting a dictator may not always pay off in the end. Incredibly, some have taken that as an attack against President Trump, which I found odd because it was really intended to poke fun at his esteemed colleague, Comrade Kim. We hoped that, with an application of a bit of intellectual contemplation, this point would’ve been clear. We also found it

odd that no one from North Korea wrote us and criticised us, but then again, modelling is not a popular pastime there. I suspect they have other things to occupy their minds.

While on the subject of threats and boycotts, today is the day we are beginning our Sticker Game, previously known as the Beer Game. As an incentive, we feature a picture of a young miss in a bikini and on the nose of a MiG-21. In an effort to avoid a firestorm of controversy that was brought forth by the faint of heart and really, really high morals in the past, this ad requires a consent to view it and you must consciously click on a window to go on. I must point out that we will not be taking into account any objections to the ad whatsoever, people go to and view of their own free will, and I apologise to all others for the inconvenience. Why we jump through these hoops is clear to all that view this advertisement, I suspect. I would also point out that have really nothing against attractive women in bikinis. In the spirit of ‘takes one to know one’, I suspect that we guys are much the same in that regard. It is interesting to note that all previous five protests against women in bikinis came from the nation that painted the most women in bikinis on the noses of aircraft and that gave the world the idea of noseart. The world is full of paradoxes.

More on the Sticker Game, including all the versions of the stickers themselves, can be found elsewhere in this newsletter and I won’t bore you with any extended versions of explanations. I will, however, add that the game is tied to the MiG-21MF in the Royal Class boxing, and stickers and gamecards

were sent in all sold MiG-21MF Royal Class kits (R0017), and from today they will go into all packages. The game will go on while supplies of the stickers last and I hope you will like them, and that you will find the game enjoyable. Oh, and the miss in the bikini will also be issued as an EduArt print.

Today also marks the beginning of our 'Month of Our Trees', which is the name of an event the aim of which is to sell a greater number of Overtrees. I suspect that what Overtrees are is not a secret and you know the concept. If not, further information may be gotten [here](#). The Month of Our Trees ends on July 31, and a list of the Overtree items available may be found further in the newsletter.

The Kitsaloon Nymburk show went off in June, too. It was held in the same venue in Lysá nad Labem that will host E-day on September 28th. The only real difference will be in the size dedicated to the show. Kitsaloon saw use of only half of the hall, while E-day will use it all. The experience and what amounted to a trial run in Kitsaloon was a good one and we have had no negative feedback. Preparations for E-day are in full swing and we are working on the program details, and should you like any sort of indication as to the admissions model for the show, then the only clue I can offer is that will be closely tied to the aforementioned program.

We should have a quick look at new items for July. The main attraction is obviously the Royal Class boxing of the MiG-21MF in 1:72nd scale, and this is a very attractive package for the Czech and Slovak markets. The contents of the kit includes two models, one in each of two production versions. I have a strong suspicion that only a chosen few have a clear understanding of the actual differences of these production variants. For that reason, I recommend monitoring our Facebook profile, where these differences have already been explained, but further details are, of course, outlined here in this newsletter as well. The kit contains Cartograf printed decals with options for a dozen birds with a large sheet of stencil data printed by Eduard. There are also the obligatory photoetched accessories, masks, Brassins and poster. Pretty much a standard Royal Class item, I would think. In the case of the ProfiPACK line, we are releasing a night fighting version of the SE.5a, with three versions of flame dampers in resin, four markings options including a striking checkered airplane.

That one requires the inclusion of an extra set of markings sheet. The Weekend Line is represented by a release of another Messerschmitt G-2, flown by the well known Hptm. Carganic with a figure of Mickey Mouse. The option covers an aircraft flown by Johannes Trauloff.

There are two new accessory items in the Löök line, and these are for the P-51D and for the P-51D-5 from Tamiya, both in 1:32nd scale. The Brassin line is carrying on with new sets for the MiG-21MF, and in 1:32nd scale, we have the final sets for the Revell Fw 190A-8. In 1:48th, we have developed a set of 20mm ammunition belts and British BL 755 Cluster Bombs, which have been items fiercely requested by modellers, as were the 1:48th scale ejection seat handles for Russian seats. Modellers also appear to not be able to be without sets for the GWH Su-35S despite the fact that the kit appears to be rather difficult to find. Also in 1:48th scale, the sets for the nightfighting Defiant NF.1 from Airfix and the He 111H-6 from ICM will prove to be interesting. In 1:72nd scale, we are dressing up the Tamiya Ki-61 and the new Airfix Sea King. There

are three armour models being covered in 1:35th scale, the Panther A from Takom, in this case a later variant, the M3A3 from Kintetic and for the modern American M35A2 truck. I shouldn't forget to mention the Meng 1:700 scale Bismarck sets. The first of these has been a long time coming, as it's been a while since we have released anything in that scale.

July will be a different month, in which not too much will be happening. We Czechs start the first week of July off with two holidays, so work is not too intense, and Eduard will be no exception. I don't really expect things to start picking up again until probably the beginning of August, when we will hold our Afterparty event in connection with the IPMS Nationals in Phoenix, and when the Bf 109G-10, along with the other new August items, hit the market. August items are also covered in this newsletter, so they are here, if you want, em. And finally, no surprise, but we will be at that IPMS National Convention in Phoenix. Hope to see you here.

Happy Modelling!

Vladimir Sulc.

L-29 Delfín 1/48

a/c No. 2853, 1st Flight, 11th Fighter Regiment, Žatec, 1993

a/c No. 1928, 3rd Air Base Malacky, Slovakia, 1993

Cat. No. 8464

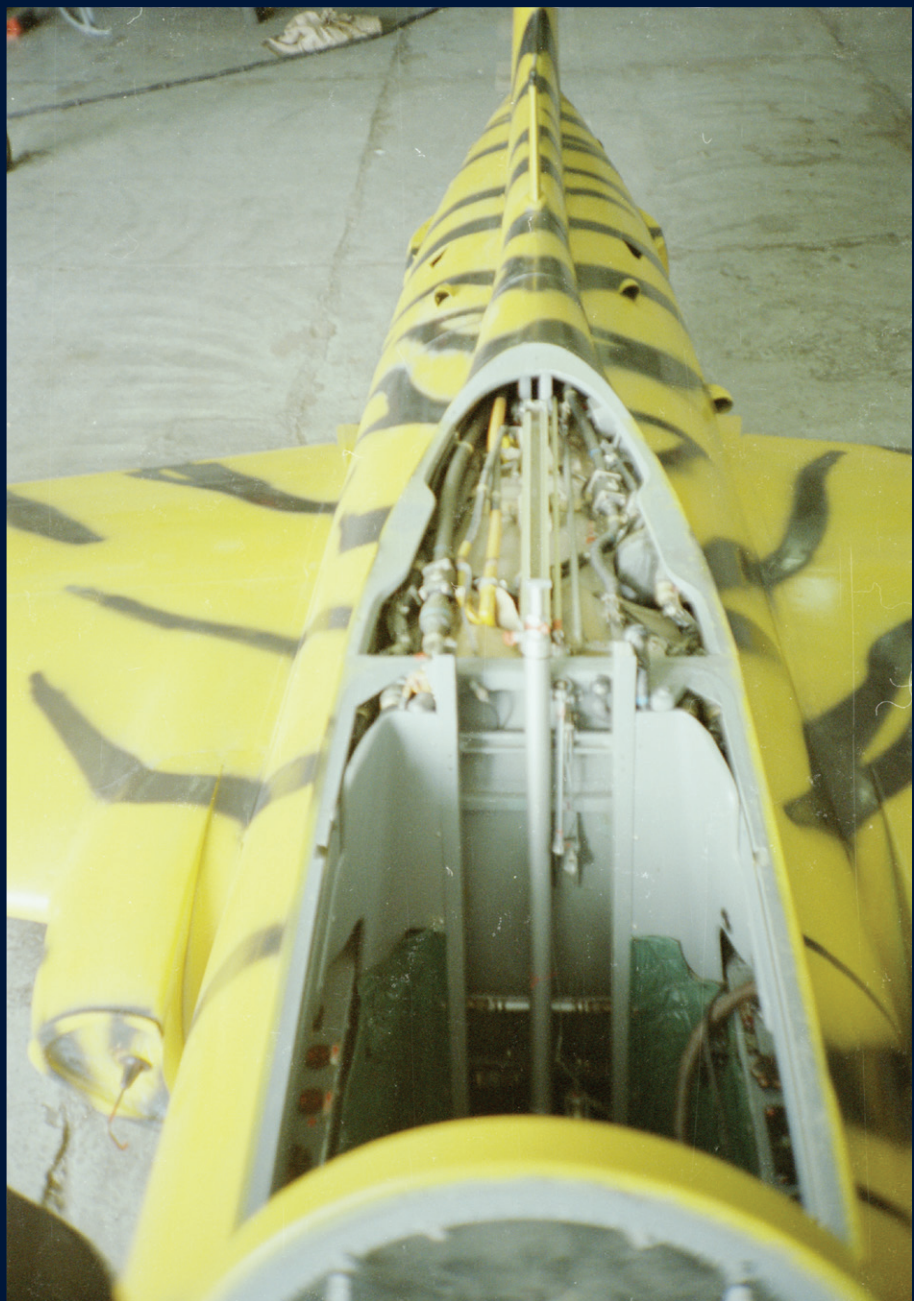

[Product Page](#)

This Zatec 11th Regiment Delfin s/n 2853 received this finish at the beginning of June 1993. Its development was undertaken by the ground crew of No. 1 Flight with assistance of Captain Ing. Karel Krejci, who, a quarter of a century later, from the position of Eduard's researcher, carefully supervised the construction of markings for the current L-29 kit Weekend edition.

Introduction of this plane to the public came on July 10th, 1993 at an airshow in Žatec. After the disbandment of the 11th Fighter Regiment, the aircraft was transferred to the 1st Training Regiment at Přerov.

Camo BFC

built by Tomáš Török

RB273, Fl/ Lt. David Ince, No. 193 Squadron, No. 146 Wing, R.16 Hildesheim, Germany, September 1945

RB273 was delivered to 51 MU, Lichfield on October 12th, 1944 but did not reach its first operational unit until January 1945 when it was allocated to 257 Sqn. After damage and repair in February it was transferred to No. 193 Squadron and flown by the 'A' Flight commander, Flt Lt David Ince, coded DP-E. Having dropped the RAF's first Napalm weapons in NW Europe in a brief operational trial in April 1945, Ince went on to demonstrate its use number of times in the post-war period, in ultra-low level attacks. RB273 was retired with the rest of the Typhoon force and was scrapped at 84 GDC in November 1945.

The aircraft carries a standard RAF camouflage consisting of Dark Green, Ocean Gray and Medium Sea Gray. The cannon barrel fairings, the inside surfaces of the main landing gear covers and spinner were in scarlet, and only the base of the spinner was in white. Ahead of the windscreen on both sides of the fuselage, the No. 193 Squadron badge was carried. Napalm bombs were carried under the wings that were modified out of 90 gal drop tanks. Their original Medium Sea Grey colour was changed to red.

Fw 190A-3

1/48

Built by Jan Novotný

Camo D

W. Nr. 2278, Uffz. Erich Pflaum, 2./ JG 51, Ljuban, Soviet Union, September 1942

I. Gruppe JG 51 was, in the summer of 1942, chosen to be the first of the units serving on the Eastern Front to be re-equipped with the Fw 190. It moved to Königsberg, where it was assigned a mix of Fw 190A-1, A-2 and A-3s, and after conversion training returned back to the northern sections of the Eastern Front at the end of August 1942. The first Fw 190A-3 from I./JG 51 that was lost in combat was piloted by Uffz. Erich Pflaum on September 29th, 1942. The pilot, although injured, survived.

The aircraft flown by Erich Pflaum was painted in a non-standard scheme consisting of two shades of dark green. Exactly what these two greens were is as yet unclear. One possibility is a combination of RLM 70 and 71. The yellow lower wingtips, the fuselage band in the same colour below the fuselage cross identified this aircraft as having served on the Eastern Front. The engine cowl carries the unit marking of JG 51 and below the windscreen is the insignia of I./JG 51. The original yellow fuselage band is still visible under the camouflage paint. The thin black tape bordering the yellow band below the fuselage cross probably served to sharpen its edge during the paint work conducted on the aircraft.
